TRIFLOR ROLLER VENETIAN BLINDS
An elegant mix of roller blind and venetian blind

With the Triflor roller venetian blind, soft fabric slats between two fabric sheets guarantee flexible light control. The slats can be tilted as required and immerse the room in a pleasant, diffuse light.

The Triflor roller venetian blind is operated either using a pull chain or by electric motor for extra convenience. The fully-developed technology guarantees optimum ease of operation. Profiles and plastic parts are available in either white or silver anodised.

There are already 4 fabric collections available for the Triflor roller venetian blind: Campo, Elvo, Nativo and Borso – with no less than 27 colours to choose from.

The Triflor roller venetian blind is the perfect combination of functional operating technology and decorative fabric drape.
