- clear, elegant profile design
- optimised skylight concept
- new collection with over 300 positions
- fabrics made from recycled materials
- many new structured and printed fabrics

COSIFLOR[®]
Pleated Blinds

THERE IS NO PLACE LIKE HOME

Design 20525, Cara Crush Perlmutter Color B1

Creating an oasis of calm and getting a little closer to nature - Cosiflor pleated blinds are ideal for this. The wide range of calm, earthy and natural tones in particular contribute to this. With the VS 2 Slide Comfort, dimensions of up to 180 x 180 cm are possible with a tensioned pleated blind - the guided handle bar provides additional support and is particularly user-friendly.

Design 20525, Cara Crush Perlmutter Color B1

Design 30941, Vilaro

Design 30941, Vilaro

There is nothing that remains to be desired here - our collection provides a varied selection with over 300 fabric choices. Whether plain colours, prints, structures, blackout qualities, with a pearlised coating on the reverse or with a flame-retardant finish - the best solution for every need.

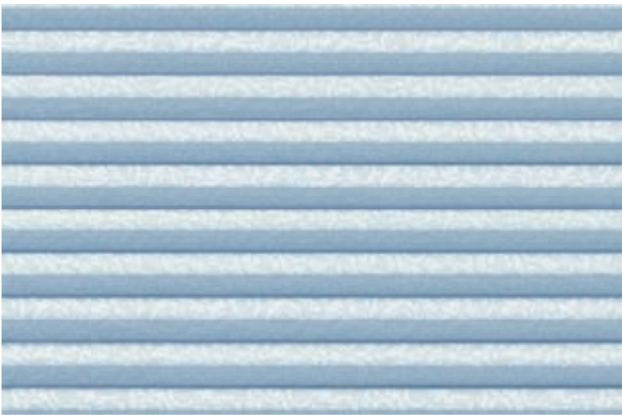

COSIFLOR[®]
Pleated Blinds

Cosiflor pleated blinds meet all the demands placed on modern privacy protection. In terms of application and design, all challenges are mastered.

Design 30402, Maleza

Especially popular are tensioned Cosiflor pleated blinds. They offer customised solutions for almost all window shapes. The VS 2 model type is exceptionally variable when it comes to operation: whether from top to bottom, from bottom to top - everything is conceivable.

Design 30571, Arabesque

THERE IS NO PLACE LIKE HOME

If you are looking for a long-term and high-quality solution for controlling light, you quickly settle on Cosiflor pleated blinds. Available in transparent, semi-transparent and darkening, you find plain colours, prints and structures. There is something for every taste.

- ISO 14001

This product was harmful substances according to OEKO-TEX® standard 100 tested.

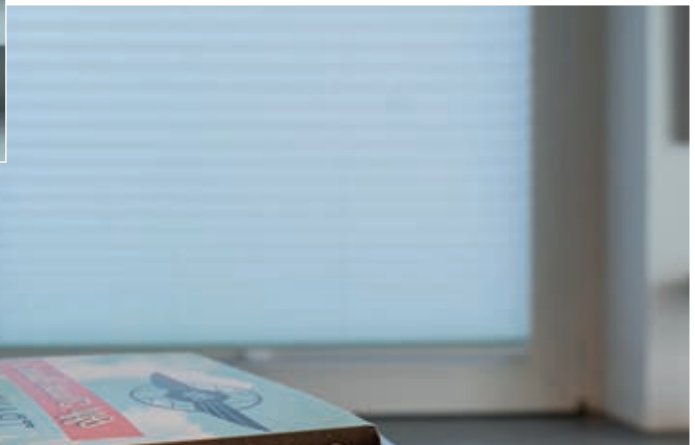

This product was harmful substances according to OEKO-TEX® standard 100 tested.

ReTex

Environmental protection and design are in harmony

- 100% recycled yarn from industrial waste
- certified according to REACH
- produced according to Ökotex standard
- PVC free

Design 10773

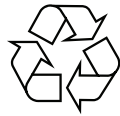

Green living becomes easier

Worldwide, up to 13 million tonnes of plastic waste ends up in the oceans. To counteract this, more and more materials are being developed from recycled plastic. „EvoTex“ and „ReTex“ combine stylish privacy and sun protection with pioneering solutions for waste minimisation.

Thinking in new dimensions

We live in a time when sustainability and beauty are no longer mutually exclusive. But what does that mean in terms of our everyday lives? How can you live a more ecologically responsible life within your own four walls? Simply start by choosing the right pleated blinds.

NEW SYSTEM
SAME SPIRIT

Cosiflor FE A - the battery solution for technology lovers

With the FE A electrical blind, the fabric of the pleated blind can be moved into the desired position by a powerful 7.4 V motor. The battery has a remarkably high storage capacity of 2,600 mAh and supplies the motor with power over a long period of time. It can be easily integrated into the head rail making it invisible.

Despite its exceptional performance and capacity, this electric system is priced in the entry-level range and offers the best priceperformance ratio.

Cosiflor electric pleated blinds can operate single or grouped together. The remote control is wireless to ensure convenience wherever you are.

Electrical blind FEhomematic^{IP}

- through an integrated 11.1 V battery motor the fabric of the pleated blind is moved to the desired position.
- it is operated via smartphone app or optional radio remote control.

With the various operating options, Cosiflor pleated blinds can be adapted to any skylight situation.

Handle bar (for DFC 20, DFC 30)

- orders for DFC blinds are generally delivered with this handle bar.
- operation with operating rod possible.

Operating handle (for DF 20)

- orders for DF blinds are delivered by default with this operating handle.
- operation with operating rod possible.

Design handle (extra charge) (for DF 20)

- visual upgrade by use of a powder-coated design handle made of high-quality metal alloy.
- operation with operating rod possible.

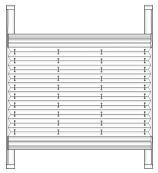

Cleverly thought out - the pioneering solution for skylights

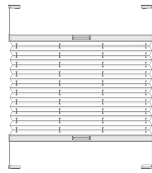

The DF Comfort models can be optionally equipped with magnetic fixing, which guarantees a firm grip of the top rail. The U-profiles ensure a significantly minimised incidence of light and skilfully conceal all mounting elements, while the sliders inserted at the back ensure harmonious guidance of the handle bar. Optionally, all Comfort models are available with a brush strip that additionally minimises the incoming light.

COSIFLOR VS blinds (not all models shown)
