

VS 2 MaxLine

FOR LARGE FORMATS

The trend towards large window fronts presents new challenges for sun shading. With the new model **VS 2 ML** Cosiflor is now offering a made-to-measure solution for large format windows.

The model has no protruding elements and offers convenient operation with the ergonomically shaped handle bars.

COSIFLOR VS 2 ML

An overview of the details:

- Size range:
(W x H) 200 x (follows) cm or
(W x H) 160 x (follows) cm, max. area (follows) m²
- Fitting: for all common VS 2 fitting options
- Operation: with handle bar or operating rod
- Rail colours: white, grey, anthracite or black

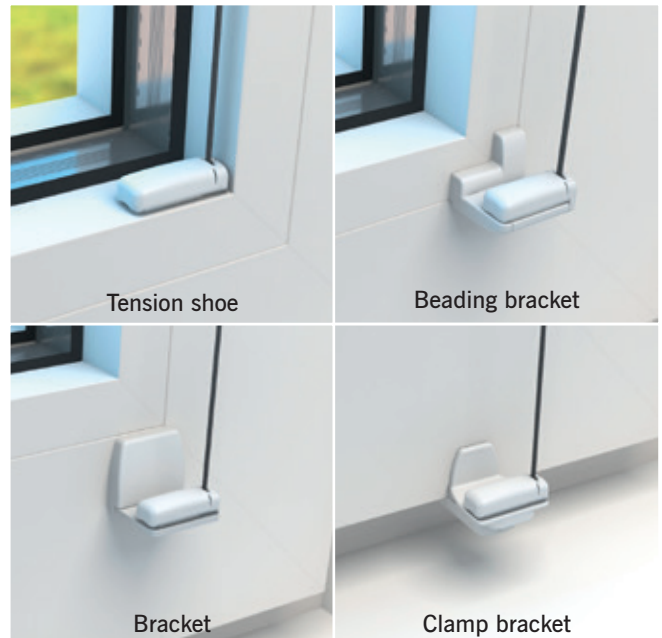

The benefits of the COSIFLOR VS 2 ML:

- The ergonomically shaped handle bar has minimal deflection thanks to its optimised cross-section.
- The profile depth is 20.8 mm and is therefore also ideal for sliding doors.
- The magnetic fixing ensures a secure hold of the upper profile.

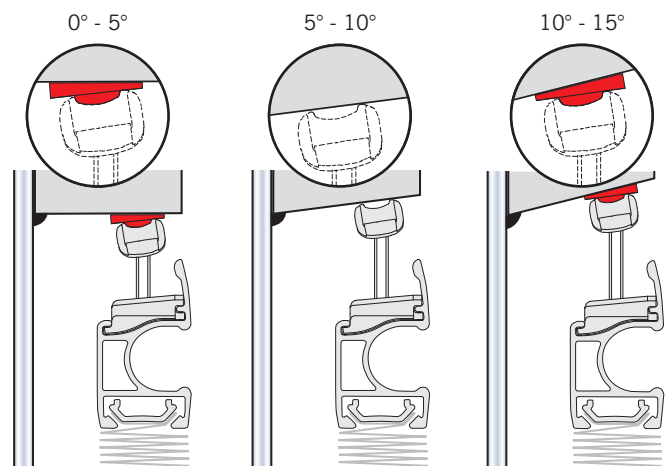

Processing:

- Only the extension of the assembling set for a VS-system and the rail clamps for the test boom are required for production.
- Cord diagramm according to VS 2 X.
- Can also be produced automatically on the PDU and the cording unit.

Fitting options:

The **adaptor for the tension shoe** ensures that it is always aligned parallel to the magnet in window beading up to 15° and that the rail is straight.
